This 2014 Ferrari LaFerrari is one of 499 coupes built between 2013 and 2016. Power is provided by a naturally aspirated 6.3-liter V12 and a KERS-derived electric motor that combined for a factory-rated output of 950 horsepower and 664 lb-ft of torque. Additional features include a seven-speed dual-clutch transaxle, an E-Diff3 electronic differential, a 120-cell lithium-ion battery, magnetorheological dampers, Brembo carbon-ceramic disc brakes, 19" and 20" forged alloy wheels, an Inconel exhaust system, carbon-fiber exterior and interior accents,

Ready to deliver anywhere in the world.
